A LOCAL SENSATION RECALLED.

With the news of the death of ex-Sheriff FLACE's second wife, the "SARAH CHERRY" of the Plack trial, there is brought back to public mind a case which has figured among the most strik ing and, in many ways, most painful of all local sensations. Not purely local, either, for the story went far and wide ereafe-keeping of any rejected manuscripts rarely that a relation of events in real life ho involves so many elements upon which morbid curiosity may feed.

As a story of wrongful infatuation, the Flack case bore such a weight of warning as only powerful truths could bear. And of men's schemings to misuse the high watched the graceful movements of the bird privileges of a court and to abuse books with great curiosity. He was even more of official record. Add to these things the fast of the sudden withdrawal of a curtain which had hidden the astounding private life of a man whose career in office had alone been public before, and the combination is complete.

It was all a most notable piece of history. Yet it will sink again and rapidly cernedly, while the crowd jeered at the infrom the popular mind, and it may be long years before another event occurs to resurrect its memory. It will be well so.

COURTING BY PROLY.

A Rochester scandal is on display in one of the Rochester courts. The principal point in it is that a husband is suing his mother-in-law and a third party for alienating ! life's affections. The ... of it is that the wife says she never loved her husband, and that her

parents did all the courting for her. There is something aboriginal in this way of making a family beginning. Of course, it saved the young lady lots of time and the young man some expense. It may, too, have saved gas and coal and wear and tear of parlor furniture for the Thore were 1, 550 houses destroyed by the reold folk; but the barmecidal barbarity of cent great fire at St. John's, Newfoundland, it is enough to make us throw our Swin. and 10,234 people burned out. burnes out of the window and turn our

A Japanese Family's Dinner.

The usual dinner in a well-te-do Japane family consists of rice, soup, fish and two three vegetables, always served with she sauce, a pickle very much like German sa kraut, and other pickles of egg plant, cucs bers, turnips or radishes. The soup is me from fish. The fish itself is broiled, stew or fried. Rice always takes the place bread. The only meal at which sweet cal are eaten is at the afternoon tea, between and 4 o'clock. Some of these cakes are m from boiled beans made into paste, flavor and sweetened. Sponge cake is also

much liked. The illustration shows a purse-shap made of a small silk handkerchief with ch centre and plain eige. Two edges of this first sewn together, leaving a small st open in the mildle; one end then sews gether plain, and the other gathered upcle wo metal or other rings and a bar com the bag as is shown in the picture.

Geometry Simplified. It is very easy to demonstrate with qui simple materials, and without calculation one of the most important theorems of good eiry in space, viz., that the surface of a sphere is equal to four times the surface of a gree circle. Let us saw any wooden sphere w ever through the centre and let us take of the haives and fix a cord thereto by m of a nail inserted at the pole of the gr circle, that is to say, at the point of the h

the cord around the nati as if a top, so that it shall exactly the entire curved surface of the half of ball that we hold in the hand. Now let ! stop and cut the cord at the place where them; then they will not seek companionship half of the ball and a piece of cord of same thickness as the other. Let us fix extremity by a pall driven at the centre since our saw passed through the cen Respect their little secrets; if they have let us wind the cord spirally around the na concealment, worrying them will never make in keeping it flat upon the circle. Let us at them tell and pattence will probably do its when the circle is entirely covered, and of the cord at the place we terminated. Let opinions of their own; make them individuals shall find that the piece wound upon the and not more echoes. that the surrage of the entire aphere is que rupie that of a great circle : Q. E. D.
